WingX Pro7 Wins Aviation Consumer's Best iPad App of the Year Award

Advanced features, broadest support for ADS-B weather and traffic, and ease-of-use raise the bar for pilots

Parkland, FL -- July 9, 2013: Hilton Software LLC, a leader in advanced mobile aviation technology, today announced that Aviation Consumer has awarded the company's WingX Pro7 as winner of the prestigious 2012 Best iPad App of the Year Award. Selected by Aviation Consumer editors and reviewers and drawn from all products Aviation Consumer tested in the past year, the annual list identifies the best and most innovative products and services in general aviation.

"We are honored to receive this award as it validates our approach to expanding pilot choice and maximizing pilot safety with innovative flight tools and compatibility with the widest array of mobile hardware," said Dr. Goldstein, founder of Hilton Software, LLC. "We are committed to providing pilots with the very best technology backed by superior customer support."

"With the widest and most sophisticated feature set, relative ease of learning and customer-centric nature, we picked WingX Pro7 over a tough field of candidates," stated Aviation Consumer. The editors continued to praise WingX Pro7 for two "exceptional" features: "It works with the broadest array of remote devices such as ADS-B traffic and weather, and its moving map functions are the most complete and flexible."

Pilots choose WingX Pro7 for its many industry firsts and innovations including:

- Integrated ADS-B Weather and Traffic for improved situational awareness. WingX Pro7 was the first major iPad app with ADS-B weather and traffic using a highly-efficient ADS-B Engine.
- Split Screen for simultaneous viewing of virtually any two displays providing heightened situational awareness.
- ChartTouch™ for automatically adding a fix or VOR to an approach chart just by tapping on it.
- Terrain Profile View for pre-flight and in-flight display of the terrain ahead or along the entire route.
- SmartTaxi™ to highlight which runways pilots are on and near and display the distance remaining ahead for safe airport operations.
- FlightShare™ technology enabling pilots to share flight plans in the air with no Internet connection.
- Search and Rescue grids and search patterns for the Civil Air Patrol and Coast Guard.

About Hilton Software LLC

Founded in 2003, Hilton Software LLC is a market-leader in the development of mobile aviation software for General Aviation, Commercial, and Military pilots. Hilton Software LLC partners include Cessna Aircraft and AOPA. The company is expanding its line of successful products to make aviation safer, more affordable, and more efficient.
