SkyVision Extreme									
Salus-3 ⁵	\$1299	WiFi	•	•	•			Plug, Bat	In/Out

- Garmin (GDL39) and Appareo (Stratus) both use proprietary ADS-B receivers; both have declined.

GPS Receivers (Bluetooth)

	Price	WAAS	WingX Pro7 Bypasses Core Location	WingX Pro7 Shows WAAS Flag
BadElf				
BadElf GPS	\$99	•		
BadElf GPS Pro	\$150	•		
Dual				
XGPS150/A	\$90	•	•	•
XGPS160	\$145	•	•	•

- WingX Pro7 is compatible with all other external GPS receivers that use iOS Core Location

Notes

1. Provides GPS Location information
2. 1090 Channel is for traffic only and most-often for 'big-iron'; e.g. American, Virgin America...
3. Planned support
4. Stratux is a 'home-built' ADS-B receiver – you can purchase parts from Amazon for \$100-\$150, with either one or two radio receivers (single or dual channel) and even AHRS. It requires power to its USB port
5. Compatibility validated by manufacturer
6. Discontinued by manufacturer

This is just a guide
We are not responsible for any errors
Do your own research before buying a receiver
Verify receiver availability, price and other information with respective ADS-B manufacturers
