## Max Trescott GPS Guides for the iPhone

New, comprehensive iPhone guides and checklists for popular GPS units!  
Now Available from Glass Cockpit Publishing

Mountain View, CA — GPS technology is an essential part of many General Aviation cockpits, yet half of GPS users surveyed said they have difficulty getting a GPS to do what they want. Using flight plans and finding infrequently used pages were the most common issues. Now new *Max Trescott GPS Guides* for the iPhone are available to help pilots operate their GPSs. Introduced through a partnership with Hilton Software, the initial release includes applications for the Garmin GPSMAP 296, 396, 495, 496, 695 and 696 GPSs. "We are happy to extend our market-leading position on the iPhone by partnering with Glass Cockpit Publishing to create GPS Guides for the iPhone. The new GPS Guides offer unprecedented ease of use and eliminate fumbling through checklists." said Dr. Hilton Goldstein, CEO of Hilton Software LLC.

The *Max Trescott GPS Guides* work equally well as illustrated self-learning guides and as quick reference checklists. Organized by function, a menu tree structure makes it easy to drill down to find exactly what you need. Color screen images let you see how the GPS looks at each step in the process. Since iPhone users always carry their phone, pilots are never without GPS information when they need it.

### More Than Just a Paper Checklist

Each page in the *Max Trescott GPS Guides* has detailed explanations and GPS screen shots, not just a list of steps. Tips are also included offering suggestions on how best to use the GPS. Plus you'll always have the most current information, since you can download application updates after new GPS features are introduced. Best of all, you can cut down on the bulk in your flight bag—get all of the Guides without adding an ounce! Detailed explanations on accessing weather information are included for all XM Weather enabled GPSs.

### Save Time

*Max Trescott GPS Guides* save time—no more hunting through user manuals. Instead get clear, concise answers to your GPS questions. Improve productivity; use the Max Trescott GPS Guides to study whenever you have a free moment.

### Written by a GPS Expert!

Max Trescott is the 2008 National Certificated Flight Instructor of the Year. He is the author of the newly released *Max Trescott's GPS and WAAS Instrument Flying Handbook* and the bestseller *Max Trescott's G1000 Glass Cockpit Handbook with WAAS*.
