

Hilton Software LLC Releases WingX™ for BlackBerry Smartphones

San Jose, CA - July 8, 2008: Hilton Software LLC today released a BlackBerry-compatible version of its flagship product WingX, the premier aviation tool that provides pilots, air taxi operators, and fleet operators with the utmost flexibility in pre-flight, in-flight, and post-flight operations. Bringing the rich feature set of WingX to BlackBerry smartphones further solidifies Hilton Software's market-leading position in mobile aviation technology.

“Building on our current success in the industry with our Windows Mobile product line, this latest release blends the tremendous power of the WingX Technology (the basis for Jeppesen Mobile) with the ubiquitous BlackBerry smartphone -- enhancing aviation safety and operational efficiency. Pilots can now have fast access to a comprehensive Airport/Facilities Directory and every NACO approach chart and airport diagram in the US, all while flying at altitude and out of cell phone coverage. In addition to color-coded METARs and TAFs, pilots can view NEXRAD, satellite, and other weather images in real-time.” said Dr. Hilton Goldstein, company founder and CEO.

WingX for the BlackBerry runs on the latest BlackBerry phones including the BlackBerry Pearl, BlackBerry Curve, BlackBerry Bold, and the BlackBerry 8800-series smartphones.

Availability

WingX for the BlackBerry is available for download now at <http://www.hiltonsoftware.com> or Over-The-Air from <http://mobile.hiltonsoftware.com> and can be purchased for \$129.95. For additional information about Hilton Software LLC or its products, please call 866-42-WINGX or email support@hiltonsoftware.com.
