

WingX Pro7 Version 6.2 Adds Passive RADAR Altimeter™, Flight Simulation Mode, and Real-Time Descent Profile Information

San Jose, CA – March 12, 2012: Hilton Software LLC today introduced new leading-edge Passive RADAR Altimeter technology for iPad and iPhone. The Passive RADAR Altimeter displays terrain elevation and the aircraft's approximate AGL; together with Dynamic Terrain Overlays and Synthetic Vision, WingX Pro7 continues to significantly reduce the risk of Controlled Flight Into Terrain (CFIT). WingX Pro7 Version 6.2 also adds Flight Simulation Mode that enables pilots to pre-fly an entire flight, portion of a flight, or an approach into an airport. Version 6.2's Moving Map integrates Descent Profile Information that displays descent and landing information to the destination airport or runway touchdown zone.

Dr. Goldstein, Hilton Software LLC's CEO says "We are driven by our desire to increase aviation safety and efficiency. Our new 'no hardware, no wires' Passive RADAR Altimeter solution is revolutionary in mobile aviation computing. WingX Pro7's new Simulation Mode gives pre-flight a whole new meaning by driving all the pieces of WingX Pro7 including the Moving Map and Synthetic Vision. This enables pilots to simulate an approach into an airport while viewing and interacting with WingX Pro7 as though the approach was actually being flown. Instead of developing a simulator that runs on a desktop, we built flight simulation into the iPad. Another great feature in WingX Pro7 is the addition of Descent Profile Information that not only displays VNAV-like information, but also displays which runway the aircraft is approaching thereby reducing the risk of a runway incursion. We've also added tighter integration with Google Earth™ that enables pilots to view their planned route in Google Earth™."

Availability

WingX Pro7 Version 6.2 is a free update for registered users and is available now for download from the App Store and iTunes. For additional information about Hilton Software LLC or its products, call 408-268-8418 or email support@hiltonsoftware.com.

About Hilton Software LLC

Founded in 2003, Hilton Software LLC is a market-leader in the development of mobile aviation software for General Aviation, Commercial, and Military pilots. Hilton Software LLC partners include Cessna Aircraft, Control Vision Corp, AOPA, Seattle Avionics Inc., and Jeppesen Sanderson Inc. The company is expanding its line of successful products to make aviation safer, more affordable, and more efficient. For more information, see www.hiltonsoftware.com.
