

Hilton Software LLC announces WingX® Pro7 for iPad – The \$99 Moving Map

San Jose, CA - June 10, 2010: Hilton Software LLC, a leader in mobile moving map aviation software, today announced WingX Pro7 for iPad. WingX Pro7 features an advanced GPS-Enabled Terrain-Aware Moving Map with an incredible touch screen interface. WingX Pro7 is highly configurable allowing pilots to view an approach chart and moving map simultaneously. WingX Pro7 includes a comprehensive A/FD and AOPA Directory with Yelp integration, all the NACO/AeroNav approach charts with patented SmartTaxi™ technology, weather information, animated weather graphics, advanced route planning, superb DUATS integration, and much more.

Dr. Goldstein, founder of Hilton Software LLC says “I am truly excited about WingX Pro7. The large screen and intuitive interface is phenomenal. If you are tired of learning your GPS’s switchology, WingX Pro7 is the answer. One of our company goals is to reduce the cost of flying. With WingX Pro7, an annual subscription of just \$99 saves thousands of dollars over the smaller dedicated GPS devices that lack approach charts, DUATS integration, and many other features. With twice the number of pixels as the Garmin 696 and six times the number of pixels as the Garmin Aera, WingX Pro7 for iPad is a game changer. But best of all, we have kept the annual subscription below \$100. I simply call it ‘The \$99 Moving Map’.”

WingX® products run on iPad, iPhone, iPod Touch, Android, BlackBerry, and Windows Mobile.

Availability

WingX[®] Pro7 for iPad will be released June 2010 and will be available on the Apple App Store. For additional information about Hilton Software LLC or its products, please call 866-42-WINGX or email support@hiltonsoftware.com.
